GUIDE TO THE CUMULATIVE INDEX
OF THE RESEARCH QUARTERLY
(1960-1969)

Two separate indexes are included: (1) author and (2) topic.

In the author index, the bibliographical reference following the author's name gives title of article, volume number, initial page number, month, and year for all articles by that author during the ten-year period. Titles are listed in chronological order. A typical author entry is as follows:

Ball, Jerry R.

Effect of eating at various times upon subsequent performances in swimming, 33:163, May '62.

Effects of isometric training on vertical jumping, 35:231, Oct. '64.

In the topic index, each article is listed under those important topics about which the article provides information and/or data. A brief descriptive phrase is followed by the author's name, volume number, initial page number, month, and year. Descriptive phrases are listed alphabetically by the first important word of each entry. A typical topic citation is as follows:

bowling

cardiac response to participation: Skubic, Vera and Hodgkins, Jean, 36:316, Oct. '65

and warm-up effect: Singer, Robert N. and Beaver, Robert, 40:372, May '69

Only articles giving major emphasis to a topic were indexed under that topic. Additional coverage may have been given to a specific topic in other articles.
